## **DETAILED ACTION**

### ***Response to Amendment***

The examiner acknowledges the applicant's submission of the amendment dated 3/2/2009. At this point, claim 1 has been amended, claim 13 has been added, and claim 6 has been cancelled. Thus, claims 1-5, and 7-13 are pending in the instant application.

### ***Response to Arguments***

The applicant's argument that Shinozaki et al. fail to disclose a method for preparing electrodes based on activated carbon and carbon nanotubes on a collector comprising the steps of: blending, in a first solvent, an initial powdery carbon material comprising activated carbon and carbon nanotubes comprising graphite foils rolled up as one or more sheets to form an initial powdery carbon material in a weight proportion of activated carbon to carbon nanotubes of from 95/5 to 50/50, and adding polymer binder and blending until homogenized to form a paste. The examiner finds this argument persuasive, therefore, the examiner made decision to allow this limitation over the prior art of record.

### ***Allowable Subject Matter***

Claims 1-5, and 7-13 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-5, and 7-13, the prior art alone or in combination does not teach the limitation of a method for preparing electrodes based on activated carbon and carbon nanotubes on a collector comprising the steps of: blending, in a first solvent,

an initial powdery carbon material comprising activated carbon and carbon nanotubes comprising graphite foils rolled up as one or more sheets to form an initial powdery carbon material in a weight proportion of activated carbon to carbon nanotubes of from 95/5 to 50/50, and adding polymer binder and blending until homogenized to form a paste.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### **Citation Relevant of Prior Art**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Liu et al. (US 7,061,749) disclose supercapacitor having electrode material comprising single-wall carbon nanotubes and process for making the same.
- b. Hironaka et al. (US 6,733,925) disclose non-aqueous electrolytic solution secondary battery with electrodes.
- c. Tennent et al. (US 6,414,836) disclose electrochemical capacitors having electrodes with diverse redox potentials.
- d. Brodd (US 5,358,801) discloses solid electrochemical cell.
